Asocc. Prof. Janez Povh
Chairman of SI-MATH-IN

Prof. Wil Schilders
President of EU-MATHS-IN

Subject: Participation in European Service Network of Mathematics for Industry and Innovation EU-MATHS-IN

Dear Prof. Schilders,

as the chairman of the Slovenian Consortium for Industrial Mathematics (SI-MATH-IN), I am addressing you with a request to include SI-MATH-IN in European Service Network of Mathematics for Industry and Innovation.

One of the reasons why we want to join the EU-MATHS-IN network is to expand and deepen cooperation with comparable organizations at European level. Inclusion in the network would also enable the development of our expertise.

SI-MATH-IN is a formal organization without independent legal status which unites seven academic members and one nonacademic member. Academic members are from three of the largest universities in Slovenia and are carrying out pedagogical work as well as research work in mathematics. All members have references in Industrial Mathematics as you will be able to see from the attached document.

I think that SI-MATH-IN could contribute to the development of EU-MATHS-IN and that together we could boost mathematics for industry in Europe.

Looking forward to hearing from you.

Asocc. Prof. Janez Povh
Chairman of SI-MATH-IN
